# Turn Unsightly Brush into

**K**eeping your shrubs trimmed, trees pruned and lawn mowed probably generates large piles of clippings, brush and leaves. You can ignore it and hide it until the pile becomes too big to hide. You can burn it in those few places where burning is still legal. Or try to have it hauled away. Trouble is, with landfills closing every day, more and more local governments are restricting or banning yard wastes. But now there is a sensible, easy and affordable solution to brush and leaf disposal problems:

The TROY-BILT® TOMAHAWK Chipper/Shredder! It turns mountains of useless brush, leaves and yard wastes into mounds of useful, attractive mulch or chips, turning yard "trash" into "treasure" instantly!

As we did with our famous TROY-BILT® Tiller, we spent years studying the needs of homeowners and the strengths and weaknesses of existing machines before we made our TOMAHAWK Chipper/Shredder. A quick comparison between old-fashioned shredders and ours will show you we've produced the chipper/shredder for the 1990s...and beyond.

# Valuable Mulch and Chips!

With its compact design... extra-wide, easy-feed hopper... free-swinging, reversible flails... extra-strong construction, the TROY-BILT Chipper/Shredder delivers the performance you expect from the TROY-BILT name!

The 8HP SUPER TOMAHAWK Model has an Auto-Feed Chipper that turns brush, limbs, and branches up to 4" thick into uniform chips. Thanks to a unique combination of air flow and chute angle, all you do is drop the debris into the extra wide chute. The machine draws it in without force feeding while you reach for the next item. The wide chute compresses side branches so you spend less time trimming. The 5HP TOMAHAWK Model chips branches up to 2" thick. You can then put the chips to good use, beautifying flower and shrub beds, around trees, in walkways, even in your vegetable garden as a weed-smothering, decorative ground cover.

As a Shredder, the TOMAHAWK Model turns fallen leaves, grass clippings, twigs and small branches into nutrient-rich mulch or compost for your garden. You'll have all the natural fertilizing material you can use!

Not only is the TOMAHAWK Chipper/Shredder efficient, it's *fast*! Our state-of-the-art design shreds material *twice as fast* as most old-fashioned fixed-flail shredders. The free-swinging flails revolve at 3600 RPM and reach a top speed of 149 MPH! The flails take up to 60 "bites" per second, resulting in faster, more thorough shredding!

While you're getting the fastest chipper/shredder you can buy, you're getting the most durable, too! Our Chipper/Shredder's main shredding surface is steel. Our seams are continuously welded on both sides for extra durability. In fact, we're so sure the TROY-BILT Chipper/Shredder will last, we back it with a FULL, NO-TIME-LIMIT Warranty!

No matter what size rural property you own, there's a TROY-BILT® Chipper/Shredder Model just right for your needs and your budget. Best of all, you'll be buying legendary TROY-BILT quality and service, something only genuine TROY-BILT® products promise and deliver. Ask your Dealer for a FREE demonstration today!

## Which TROY-BILT® Chipper/Shredder is Right for You?

*For the Largest Properties*

### 8HP SUPER TOMAHAWK® Chipper/Shredder

Top-of-the-line performance for folks with large properties, woodlots or orchards; extensive landscaping or extra amounts of brush and other debris. Features Briggs & Stratton Industrial/Commercial engine with dual element air cleaner, maintenance-free electronic ignition. Over-sized hopper for easy feeding.

*For Mid-Size Properties*

### 5HP TOMAHAWK® Chipper/Shredder

Provides excellent all-around capabilities for folks with good-sized properties, numerous landscape plantings, mature shade trees, or good-sized vegetable or flower gardens. Easily handles brush up to 1" thick and branches up to 2" thick. Ideal for leaves, shrubs and hedge prunings, garden residues, moderate amounts of brush and smaller limbs. Oversized hopper for easy feeding.
